Engineering Summary

Lead-minded Senior Software Engineer with 10+ years of experience designing and scaling enterprise web platforms and APIs. Proven track record of driving architectural decisions, improving developer velocity, and delivering measurable business impact through automation and platform modernization. Strong advocate for reliability, clean abstractions, and mentoring engineers across the SDLC.

EXPERIENCE

Ithaka, Ann Arbor — Sr Software Engineer

November 2019 – PRESENT

- Acted as a technical lead for multiple initiatives spanning admin portals, reporting workflows, and public APIs, ensuring compliance with COUNTER standards while balancing performance, reliability, and maintainability.
- Led architectural modernization efforts, decomposing legacy services into AWS Lambda and Step Functions-based workflows, improving scalability and significantly reducing operational overhead.

- Drove a 3× increase in release velocity by introducing AI-assisted development workflows, automated testing standards, and CI/CD optimizations adopted across the team.
- Partnered with product owners and stakeholders to shape quarterly technical roadmaps, proactively identifying delivery risks and eliminating execution bottlenecks.
- Designed and maintained scalable CI/CD pipelines using GitHub Actions, GitLab, Jenkins, Docker, and Kubernetes, improving deployment reliability and reducing manual intervention.
- Introduced a real-time user feedback mechanism that reduced the customer feedback loop by 50%, enabling faster iteration and more informed product decisions.
- Served as a mentor and reviewer for engineers across frontend and backend stacks, providing guidance on React architecture, testing strategies, system design best practices and Kubernetes concepts.
- Recognized for end-to-end ownership—from design reviews and implementation to production rollout and post-release stability.

Infor, Ann Arbor — Software Engineer

May 2015 – November 2019

- Built and maintained enterprise-grade applications for automotive clients using Angular and Java (Spring), supporting high-volume, business-critical workflows.
- Partnered closely with the Principal Architect to review designs, discuss tradeoffs, and improve long-term maintainability across multiple modules.
- Led front-end modernization efforts, migrating legacy Angular codebases and introducing linting and coding standards to improve consistency and reduce defects.

- Optimized data access layers using Hibernate and SQL, improving reporting performance and data reliability.
- Championed Agile and CI practices, contributing to more predictable releases and higher code quality through automated testing and Jenkins pipelines.

PROJECTS

Product Builder — Fantasy League MichCA

www.fantasyleaguemichca.org

- Conceived, architected, and delivered a production-grade fantasy sports platform, owning the full product lifecycle from ideation and UX design to deployment and ongoing optimization.
- Designed a serverless backend architecture using Next.js (App Router), Prisma, and Neon Postgres, reducing match-result computation time from 30 minutes to 15 seconds.
- Made key architecture and technology decisions (Next.js, Clerk Auth, Vercel, ShadCN UI) to balance developer velocity, scalability, and long-term maintainability.
- Built a modular, design-system-driven UI using ShadCN and Tailwind, ensuring consistency, accessibility, and responsive behavior across devices.
- Introduced PWA capabilities to support partial offline usage during live matches, improving user experience for mobile-first audiences.
- Continuously monitored performance, iterated on data models, and optimized APIs to support growing user traffic with minimal infrastructure overhead.

CERTIFICATIONS & TRAININGS

Certified Kubernetes Application Developer (CKAD)

- Certification ID: LF-hfc7lb3taq

Certified Backstage Associate (CBA)

- Certification ID: LF-sa3hh6zbfo

EDUCATION

Masters in Computer Science

Eastern Michigan University

2013 – 2015 | GPA 3.75
